

Akshat Agrawal

Software Developer | Full Stack Engineer
+91 7455966189 | akshat160403@gmail.com
Ghaziabad, Uttar Pradesh

Github: [Akshat1643](#)
LinkedIn: [akshat-agrawal](#)

Professional Summary

Software Developer with hands-on experience in full-stack web development using React.js, Node.js, and NestJS. Proven track record in delivering scalable web applications, real-time systems, and RESTful APIs while collaborating in Agile teams. Passionate about building performant products, exploring AI-driven solutions, and continuous learning.

Education

ABES Engineering College , Ghaziabad <i>B.Tech in Electronics Engineering</i>	2021 – 2025
Nirmala Convent Sr. Sec. School , Haldwani <i>Class 10th (CBSE) - 89.6% Class 12th (CBSE) - 83.4%</i>	2019 & 2021

Technical Skills

Languages: JavaScript (ES6+), SQL

Frontend: React.js, Tailwind CSS, Bootstrap, Hooks, Context API, Responsive UI

Backend: Node.js, Express.js, NestJS, REST API Design, WebSockets, JWT Authentication

Databases: MySQL, MongoDB, Redis

Tools: Git, Postman, VS Code, Docker, Prisma, Sequelize

Concepts: Caching (Redis), Async Processing (BullMQ), Real-Time Systems, Scalable Architecture

Specialized: Scalable API Design, WebSockets, BullMQ, Redis, Real-Time Communication, Backend Performance Optimization

Projects

Tambola Multiplayer Game | NestJS, WebSockets, Redis, BullMQ, Prisma, MySQL

- Engineered a real-time multiplayer Tambola backend using NestJS and WebSockets, supporting concurrent game rooms with live state synchronization via Redis Pub/Sub.
- Implemented BullMQ for background job processing covering number draws, timers, and winner validation logic.
- Integrated Prisma ORM with MySQL for data handling, with auto-ticket generation and claim verification.

Butter App – Food Recommendation Platform | Node.js, Express.js, MongoDB, Redis, REST APIs

- Built backend services for a food recommendation platform with modular REST APIs for user preferences, restaurant data, and recommendation logic, including pagination, filtering, and sorting.
- Integrated MongoDB for flexible data storage and Redis caching to reduce response times.
- Optimized queries and indexing strategies to efficiently handle growing data volumes.

Kivo.ai – AI-Powered CRM Platform | React.js, Tailwind CSS, REST APIs, React Context

- Built reusable, accessible UI components for an AI-powered CRM using React.js and Tailwind CSS, delivering fully responsive layouts across desktop, tablet, and mobile.
- Integrated frontend with RESTful APIs handling async flows, loading states, and error boundaries.
- Managed state via React Context and custom hooks for improved reusability across dashboard and form flows.

Contact Sharing App – QR + AI Automation | Node.js, Express.js, Google Gemini API, Redis, MySQL, JWT

- Developed a scalable contact-sharing platform with QR-based exchange, JWT-secured APIs, and a Google Gemini-powered pipeline to extract structured data from visiting card images.
- Integrated Redis caching to reduce database load and improve API response times.
- Built a role-based admin panel for user management and platform analytics.

Experience

W3Villa Technologies Pvt. Ltd.

14 May 2025 – Present

Software Developer

- Reduced API response time from 5 seconds to under 1 second by implementing Redis caching, resolving N+1 query issues, optimizing database queries, and improving indexing strategies across multiple production applications.
- Architected and developed scalable backend systems using NestJS, Node.js, and Express.js with microservice-friendly architecture, REST APIs, and real-time WebSocket communication for concurrent users.
- Built and scaled core products including a real-time multiplayer Tambola platform with WebSockets and BullMQ, a food recommendation platform with optimized recommendation APIs, and an AI-powered CRM (Kivo.ai) with dynamic dashboards and role-based access control.
- Engineered asynchronous workflows using BullMQ and Redis for background jobs, game logic, timers, event-driven processing, and real-time state synchronization to improve scalability and system reliability.
- Developed reusable React.js components and responsive user interfaces using Tailwind CSS, React Context, and custom hooks while integrating secure and scalable backend APIs.

Honors and Awards

Intellia Society Hackathon

- Ranked among the **Top 10 out of 50 participants**, demonstrating strong problem-solving and rapid prototyping skills under time-constrained conditions.

Leadership & Extracurricular Activities

Active Member of SAC Committee, ABES Engineering College

Aug 2022 – 2025

- Contributed to student activity planning and execution, coordinating events and initiatives that fostered engagement across the college community.
